- Format Page Number		
Change how the page numbers fock in the baselin foctors.		

Type the Page Number you want to start at. You may want to use 0 if you set your document up with a Different first page. This way your first page will be 0 and not show and the second page will begin at page 1.

Number format:	1, 2, 3,		٠

THE EXPERIENCE YOU NEED & THE SUPPORT TO SUCCEED

LIBRARY AND LEARNING SERVICES STUDY GUIDE | PAGE NUMBER (2013) www.2.eit.ac.nz/library/OnlineGuides/Page Number 2013.pdf

You may want to set out an essay with two different number styles. In academic essays Roman numerals start after the title page until the body of the essay begins. For example this may include an abstract, table of contents, executive summary etc ... Arabic numbers start from the main body of the essay. To achieve this you will need to use Section Breaks in your document. Change the number format in the Page Number Format window.

It is easier to tackle the Page Layout first and create Section Breaks in your document before you add the text.

Turn the show/hide button on, this shows paragraph marks and other hidden formatting symbols (they will not show on your printed document), this will show your section breaks clearly.
