

Applying for Research Approval – Guideline

AG200-2

1. All researchers must first complete the **Low Risk Research Questionnaire** (unless they already have ethical approval from another institution or an MoH ethics committee – although we recommend they complete the questionnaire in any case), and follow the recommendations at the end of the form regarding applications.
2. Staff researchers then complete either the **RAD Form** as well as the **Consent Form** and **Participant Information Sheet** or the **Research Notification** after either receiving approval from another ethics committee or having the project assessed as low risk. That documentation is then forwarded to the EIT Research Ethics and Approvals Committee.
3. All Postgraduate students completing a thesis or final year project then complete the **RAD Form (Postgraduate)** as well as the **Consent Form** and **Participant Information Sheet**. That documentation is then forwarded to the EIT Research Ethics and Approvals Committee.
