

Plagiarism

Plagiarism is

- **presenting others' ideas and images as your own** without providing sufficient referencing, including
 - failure to appropriately cite and reference the originator of the material
 - failure to use quotation marks when using others' words
- **inadquate paraphrasing**
- **presenting as original your own work from a previously assessed assignment** without first getting permission from your tutor
- a form of **academic misconduct**

What Constitutes Others' Work or Ideas?

- **published text, audio-visual material, or images**
- **private communications** such as letters, emails, and conversations
- **content generated by AI tools**

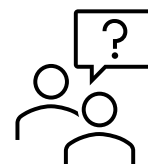

How to Avoid Plagiarism

- **Learn to paraphrase well**
- **Use quotation marks** when using others' words
- **Correctly cite and reference** all sources using APA 7th edition referencing style:
 - Use the [EIT APA Web tool](#)

- Use the [EIT APA Guides](#)
- Use the [APA Style website](#)
- **Record the reference information** at the time you collect your sources.
- **Include a reference list** in APA 7th format.
- When including images to adorn a PowerPoint presentation, it is preferable to **use the stock images available within the presentation software**. These are attribution free and covered by the software licence, therefore referencing these images is not required. However, images sourced elsewhere should be referenced.
- Correctly cite and reference **figures and tables**.
